SPECIAL CONSENT FOR MRI IMAGING WITH CONTRAST ADVANCED MEDICAL IMAGING MRI

Your physician is requesting an MRI using contrast. The use of contrast greatly enhances the diagnostic capabilities of the MRI. If you have questions about the exam/contrast, please ask the Technologist. If you have an allergy or medical condition that could be aggravated by the contrast, please tell the Technologist.

A Technologist will be monitoring you during the exam. If you experience any symptoms of a possible side effect a physician is immediately available.

You may request to have an MRI without contrast. Prior to having this exam we suggest you talk with your physician about the purpose of the exam, what will be done, the risks and benefits of the exam and any information about possible adverse reactions to contrast.

If you have any questions, please call Advanced Medical Imaging or your physician.
